

## IYT – what you deliver as a student

### Students will deliver:

1. **Three assignments** spread over the first 12 month period
2. **Worksheets** completed in class and commonly in pairs or groups
3. In-class **presentations** on condition/s and cases
4. **Practice teachings** on practices designed for special groups
5. **Voice recordings** of practices designed for patients
6. An **Internship Report** based on your Internship experience
7. A **Case Study Report or agreed piece of work** based on case studies

You will develop practices regularly in class based on presentations of conditions and outlines of patients. This trains you to develop these quickly and on the spot when working with patients.

Internships will typically last about 15 hours.

Case Studies will span 40 hours of sessions.

Case reviews are held on course in the second year to share experiences and debrief. These will be prepared inputs.
